

HC100™ Z-Band® Wristbands

SEE MORE. DO MORE.

Zebra's HC100™ allows you to print patient information and barcodes directly on Z-Band® direct thermal wristbands.

In addition, Zebra's Z-Band direct thermal wristbands:

- Feature a silver antimicrobial coating that protects the wristband.
- Are scannable for up to 14 days.
- Enable staff to quickly and easily print and securely fasten in less than a minute using an adhesive tab or color clip.
- Zebra's Z-Band wristbands are made of polypropylene. The direct thermal imaging chemistry is composed primarily of leuco dyes and developers. The inks/ varnishes used are UV varnishes and water based inks.
There is no metal content in or on these particular patient identification bands. Therefore, Z-Band wristbands are considered to be MR-Safe.
- Latex-free.

A barcode that fails to scan or requires repeated attempts to scan jeopardizes patient safety and staff productivity. Zebra's supplies research and development team tested the image durability of Z-Band direct thermal wristbands to ensure optimum image durability and scanning performance.

For more details on the durability testing performed, please download our white paper on www.zebra.com titled "*Laboratory Testing of Zebra's Z-Band® Direct Thermal Antimicrobial Wristbands.*"

ZEBRA Z-BAND WRISTBANDS ARE AVAILABLE WITH ADHESIVE OR CLIP CLOSURE, IN A VARIETY OF SIZES AND COLORS TO MEET YOUR ORGANIZATION'S NEEDS.
